**Scope of project:**

2,338 m<sup>2</sup>

**Products used & amounts:**

MasterSeal® CR 460 + Primer

Ucrete Primer SC

Ucrete RG

Ucrete UD 200

## Flooring solutions for production and bottling plant Diageo PLC - Douala, Cameroun

Our reference in Douala (Cameroun): Diageo PLC

### The background

Fruital is a major production company of juice and soda lemonade. It is best known for the bottling of Coca-Cola, which is one of its main brands under the authority of The Coca-Cola Company. Factory ensures the distribution of its products on the national territory. Wanting to extend its production space, an area of 1200 m<sup>2</sup> was reserved for enlargement.

The client specified a floor that would allow for good hygiene, with mechanical strength and resistant to the products used, in particular sugar.

### The challenge

Once the concrete base was ready to receive the coating, the applicator was forced to begin the operation while other works were taking place in parallel in adjacent locations. It was necessary to isolate the entire surface using nylon blinds made on site. The access to the site was difficult given the fact that other projects were initiated simultaneously.

# Flooring solutions for production and bottling plant

Diageo PLC - Douala, Cameroun

Our reference in Douala (Cameroun): Diageo PLC

## Our solution

The client selected the specialist-flooring contractor LST Cameroun Global of Lagos, Nigeria to install Ucrete UD 200, a heavy duty polyurethane concrete overlay system. Ucrete UD 200 was installed in a phased work schedule at 6 mm thickness. Each area of floor was returned to service 8 hours from installation and in such a manner that Diageo PLC was able to maintain full production during the refurbishment works.

Ucrete floors have been used in food processing environments for over 35 years and are characterized by their long-term durability in heavy duty environments.

## The customer's benefit

Diageo were so delighted with the performance & installation of the Ucrete floor that BASF are now the product supplier of choice for all their African facilities using a replicate system as used in this job in Nigeria. Diageo were also satisfied with LS services, an approved and experienced BASF applicator.

Ucrete is a long term and reliable solution for your floors in the Food & Beverage Industry.

## Projects facts at a glance

- Fast curing
- Non-tainting
- Non-slip under wet conditions
- Impact resistant
- Resistant to temperature up to 130°C
- Hygienic & easy to clean
- Resistant to a wide range of chemicals
