MasterEase® 3029

Low Viscosity Concrete Concept
New superplasticizer technology imparts advanced rheological properties delivering a significant decrease in the viscosity of concretes and extended rheology maintenance

DESCRIPTION
The MasterEase 3029 is a superplasticizer, high range water reducer from recent research work of R & D laboratories of BASF’s Master Builders Solutions. The MasterEase 3029 is designed to impart exceptional rheological properties to fresh concrete. It improves considerably the placing and finishing of concretes and enhances the ease of concrete pumping for all construction activities.

INNOVATION
The MasterEase 3029 is based on an innovative polymer chemistry and it is patented by BASF. Its action differs from traditional superplasticizers, to the extent that the adsorption of polymers of MasterEase 3029 on binder particles is provided by a flexible chemical bond which does not impede the flow of concretes. This innovation significantly improves rheological behaviour of concretes treated by MasterEase 3029, they have a low yield stress, low viscosity with additional feature of long workability retention.

LOW VISCOSITY CONCRETE
Low Viscosity Concrete is an innovative concept dedicated to the viscosity (rheology) of concretes. It is based on the use of MasterEase polymer with dedicated technical services of BASF's Master Builders Solutions. This concept not only allows the achievement of a significant reduction in concrete viscosity but also optimizing the performance of concrete.

FEATURES AND BENEFITS
The MasterEase 3029 is recommended for the production of self-compacting concrete requiring low viscosity, long workability retention and high compressive strength.

The MasterEase 3029 is specially formulated for the concrete industry. It is also suitable for applications in the general Civil and building sites.

It can be used for the realization and achievement of the following:
- Concrete complying to EN 206-1 / CN
- Precast and Site Mix concretes
- Superior Concrete pumping
- Reduction of Concrete waste
- Ease of compacting and finishing concrete
- High performance and ultra-high strength concrete
- Concrete for low environmental impact and high in mineral additions
- Architectural concrete

PROPERTIES
The MasterEase 3029 delivers many advantages both in the fresh concrete on hardened concrete.

At fresh state, optimizing the rheology:

Decrease in the viscosity of concretes at constant W/C

I. Improvement of the implementation of concretes
- Improved pumping (lower pressure and longer distance)
- Better response to vibration
- Greater Ease of Pumping
- Superior finishing, floating and smoothing operations
- Excellent flexibility, mobility and flow of self-compacting concrete.

Reduction possible to the W/C ratio without affecting the viscosity of concretes.
- New windows for technical and economic optimization of concrete mix designs (addition and types of binder, choice of aggregates)
- High strength and resistance to segregation
- Workability retention over 120 minutes without retardation.
- Good compatibility with all types of cement and mineral additions.

![Viscosity vs Time Graph]

MasterEase: Plastic viscosities of concrete S4 has a W/C 0.45, at T0 and T120
MasterEase® 3029

**In the cured state, improvement of sustainability**

i. Excellent early and late compressive strength
ii. Improvement of quality of surface finishes
iii. As part of a reduction of W/C
   - Increased mechanical resistances
   - Decreased porosity and permeability
   - Decreased shrinkage and cracking
   - Enhanced durability

**APPLICATION**

The optimal effect is generally achieved by dosing MasterEase 3029 in the concrete mix after addition 70% of water in the mixer. However, it is possible to dose MasterEase 3029 on aggregates directly.

**DOSAGE**

Recommended range: 400ml to 2000ml per 100kg cementitious.

For other uses, please contact your local BASF representative.

To use in synergy and combination with another Master Builders Solutions’ product range, please consult your local BASF representative.

**PACKAGING**

The MasterEase 3029 is available in 205 drum and bulk delivery.

**SHELF LIFE**

MasterEase 3029 has a 12 month shelf life from date of manufacture. It is recommended to stock it in temperature above +5°C.

**PRECAUTIONS**

Health: MasterEase 3029 does not contain any hazardous substances requiring labelling.

It is safe for use with standard precautions followed in the construction industry, such as use of hand gloves, safety goggles, etc.

For detailed Health, Safety and Environmental Recommendations, please consult and follow all instructions on the product Material Safety Data Sheet.
