Castle Hill Holden

**Location:**

Sydney, New South Wales

**Project completed:**

2012

**Applicator/Contractor:**

Lewis Concrete Solutions

**Market sector:**

Flooring

**Products used & amounts:**

MasterTop® 1080

Castle Hill Holden's car showroom spare parts store and external vehicle display area

### The background

Built by Prime Constructions for AHG – Australia's largest motoring group – the new multi-million-dollar Castle Hill Holden dealership is not only one of Sydney's newest Holden/HSV dealerships, it is also one of the most modern and well appointed. Together with its extensive showroom, sales and administration offices, spare parts store and external vehicle display area, the dealership's state-of-the-art workshop features the latest in diagnostic and service equipment.

Covering an area of more than 1,300m<sup>2</sup>, the new workshop features over twenty vehicle service bays, together with dedicated wash bays and a vehicle inspection area.

### The challenge

In large car dealerships, the workshop is essentially a 'second showroom' - it really reflects the overall quality of the business. Selecting the right floor for workshop facilities such as this is critical. Indeed, selecting the wrong floor can prove to be extremely costly – both in the short and long-term. Importantly, choosing the right floor is about so much more than just having a good looking floor. Vehicle workshop floors need to be resistant to chemicals and spills (including hydrocarbons), highly trafficable, and hard wearing enough to withstand the daily rigors of a tough workshop environment, while at the same time being easy to clean and maintain so they stay safe and looking good in the long-term.

## MasterTop 1080 delivers the goods for Castle Hill Holden

Castle Hill Holden's car workshop applied with MasterTop 1080 flooring

Application of MasterTop 1080

### Our solution

In keeping with their focus on maximizing quality, safety and aesthetics across the entire site, Prime Constructions specified the use of MasterTop 1080 from BASF for the workshop floors and walls.

Based on a high solid, two component epoxy resin system, MasterTop 1080 provides excellent resistance to both chemical and mechanical damage, making it ideal for use in a wide range of facilities, including workshops, warehouses and carparks, and for floors in production facilities and processing plants. Suitable for use on both vertical and horizontal substrates, MasterTop 1080 is supplied in a pre-packaged and proportioned kit form and is available in a wide range of colors. The walls of the Castle Hill Holden workshop have been finished in BASF Blue Grey color, while the floors have been finished in an attractive BASF Koala Grey color. In addition, the floor in the wash bays also features a slip-resistant finish for added safety.

### The customer's benefit

- Highly trafficable, and hard wearing enough to withstand the daily rigors of a tough workshop environment
- Resistant to chemicals and spills
- Easy to clean and maintain

### Projects facts at a glance

- Workshop features over twenty vehicle service bays, together with dedicated wash bays and a vehicle inspection area.
- MasterTop 1080 used on workshop floors and walls.
- Vehicle workshop floors need to be resistant to chemicals and spills (including hydrocarbons), highly trafficable and easy to clean
- Customer chose MasterTop 1080 for second dealership in Sydney.

### Master Builders Solutions from BASF

The Master Builders Solutions brand brings all of BASF's expertise together to create chemical solutions for new construction, maintenance, repair and renovation of structures. Master Builders Solutions is built on the experience gained from more than a century in the construction industry.

The know-how and experience of a global community of BASF construction experts form the core of Master Builders Solutions. We combine the right elements from our portfolio to solve your specific construction challenges. We collaborate across areas of expertise and regions and draw on the experience gained from countless construction projects worldwide. We leverage global BASF technologies, as well as our in-depth knowledge of local building needs, to develop innovations that help make you more successful and drive sustainable construction.

The comprehensive portfolio under the Master Builders Solutions brand encompasses concrete admixtures, cement additives, chemical solutions for underground construction, waterproofing solutions, sealants, concrete repair & protection solutions, performance grouts, performance flooring solutions.

® = registered trademark of BASF group in many countries
