Low Viscosity Concrete Concept
New superplasticizer technology imparts advanced rheological properties delivering a significant decrease in the viscosity of concretes and extended rheology maintenance.

**DESCRIPTION**

The MasterEase 3559 is a superplasticizer, high range water reducer from recent research work of R & D laboratories of BASF’s Master Builders Solutions. The MasterEase 3559 is designed to impart exceptional rheological properties to fresh concrete. It improves considerably the placing and finishing of concretes and enhances the ease of concrete pumping for all construction activities.

**INNOVATION**

The MasterEase 3559 is based on an innovative polymer chemistry and it is patented by BASF. Its action differs from traditional superplasticizers, to the extent that the adsorption of polymers of MasterEase 3559 on binder particles is provided by a flexible chemical bond which does not impede the flow of concretes. This innovation significantly improves rheological behaviour of concretes treated by MasterEase 3559, they have a low yield stress, low viscosity with additional feature to long workability retention.

**LOW VISCOITY CONCRETE**

Low Viscosity Concrete is an innovative concept dedicated to the viscosity (rheology) of concretes. It is based on the use of MasterEase polymer with dedicated technical services of BASF’s Master Builders Solutions. This concept not only allows the achievement of a significant reduction in concrete viscosity but also optimizing performance of concrete.

- viscosities of concrete S4 has a W/C 0.45, at T₀ and T₁20

**FEATURES & BENEFITS**

The MasterEase 3559 is recommended for the production of self-compacting concrete requiring low viscosity, long workability retention and high compressive strength.

The MasterEase 3559 is specially formulated for the concrete industry. It is also suitable for applications in the general Civil and building sites. It can be used for the realization and achievement of the following:

- Precast and Site Mix concretes
- Superior Concrete pumping
- Reduction of Concrete waste
- Ease of compacting and finishing concrete
- High performance and ultra-high strength concrete
- Concrete for low environmental impact and high in mineral additions
- Architectural concrete
- Concrete complying to EN 206-1 / CN

**PROPERTIES**

The MasterEase 3559 delivers many advantages both in the fresh concrete on hardened concrete. At fresh state, optimizing the rheology: Decrease in the viscosity of concretes at constant W/C

1. Improvement of the implementation of concretes
   - Improved pumping (lower pressure and longer distance)
   - Better response to vibration
   - Greater Ease of Pumping
   - Superior finishing, floating and smoothing operations
   - Excellent flexibility, mobility and flow of self-compacting concrete. Reduction possible to the W/C ratio without affecting the viscosity of concretes.
   - New windows for technical and economic optimization of concrete mix designs (addition and types of binder, choice of aggregates)
   - High strength and resistance to segregation
   - Good compatibility with all types of cement and mineral additions.
In the cured state, improvement of sustainability

i. Excellent early and late compressive strength
ii. Improvement of quality of surface finishes
iii. As part of a reduction of W/C
   - Increased mechanical resistances
   - Decreased porosity and permeability
   - Decreased shrinkage and cracking
   - Enhanced durability

APPLICATION
The optimal effect is generally achieved by dosing MasterEase 3559 in the concrete mix after addition 70% of water in the mixer.

DOSAGE
Recommended range: 200ml to 3000ml per 100kg cement.
For other uses, please contact your local BASF representative.
To use in synergy and combination with another Master Builders Solutions’ product range, please consult your local BASF representative.

PACKAGING
The MasterEase 3559 is available in, 205L drum and bulk delivery.

SHELF LIFE
MasterEase 3559 has a 12 month shelf life from date of manufacture. It is recommended to stock it in temperature above +5°C.

PRECAUTIONS
Health: MasterEase 3559 does not contain any hazardous substances requiring labelling.
It is safe for use with standard precautions followed in the construction industry, such as use of hand gloves, safety goggles, etc.
For detailed Health, Safety and Environmental Recommendations, please consult and follow all instructions on the product Material Safety Data Sheet.
