Unequaled solutions for carpark

Nest Oil Towers - Lagos, Nigeria

Our reference in Lagos (Nigeria): Nest Oil Towers

The background

The new Nest Oil Towers is a multi-storey office building with 12 floors of lettable office spaces and 7,500m² of multi-storey car park spaces.

This is located in one of the prime areas of Victoria Island in Lagos State, Nigeria.

The challenge

- The use of an Epoxy system on a multi-storey car park in an environment having high humidity and temperatures varying between 29°C and 32°C.
- Building is located in an area that is about 1.5 km from the Atlantic Ocean.
- Ensuring that the finished floor is not affected by the UV from sunlight.

Our solution

BASF proposed MasterTop 1210CP Epoxy car park coating which meets the specification requirements. MasterTop 548 was also used for areas that were not reachable by the screed pump. BASF flooring applicator was introduced by BASF to the customer in order to ensure proper application of the product.

The customer's benefit

- Being able to comply with complicated specifications.
- Completing the hardscape package on.
- Providing a single manufacturer solution including screed, adhesive and grout.

Projects facts at a glance

- BASF provided comprehensive technical advice and economical solutions to achieve the required performance.
- Excellent support and guidance from BASF's Technical Services team.
- Meeting the project deadlines through night shift.
