MasterGlenium® 3889

Polycarboxylic ether based superplasticizer for the production of high quality ready-mix concrete with exceptional workability retention.

**DESCRIPTION**

MasterGlenium 3889 is an innovative latest generation superplasticizer based on polycarboxylic ether (PCE) polymers, and is specially engineered for ready-mix concrete were the consistency of aggregates may be variable.

MasterGlenium 3889 is differentiated from conventional superplasticisers, such as those based on sulphonated naphthalene formaldehyde condensate in that it is based on a unique carboxylic ether polymer with long lateral chains. This greatly improves cement dispersion. At the start of the mixing process the same electrostatic dispersion occurs but the presence of the lateral chains, linked to the polymer backbone, generate a steric hindrance which stabilises the cement particles capacity to separate and disperse. This mechanism provides flowable concrete with greatly reduced water demand.

**FIELDS OF APPLICATION**

MasterGlenium 3889 is used for the production of high quality ready-mix concrete.

**FEATURES AND BENEFITS**

The ready-mix producer:
- Capability of delivering high performance concrete at any time to the job site in place
- Production of a concrete with low water cement ratios with excellent workability retention properties.
- Single product for many application needs

The contractor / applicator:
- Easier placing and faster strength development
- Improved concrete surfaces

The engineer:
- Insurance that concrete meets original specification
- High quality durable concrete

**PACKAGING**

MasterGlenium 3889 is supplied in 210 litre drums, 1,000 litre containers or in bulk.

**TYPICAL PROPERTIES**

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appearance</td>
<td>Whitish to light brown clear to cloudy liquid</td>
</tr>
<tr>
<td>Specific gravity @ 25°C</td>
<td>1.073</td>
</tr>
<tr>
<td>pH value</td>
<td>5.0 – 7.0</td>
</tr>
<tr>
<td>Chloride content</td>
<td>&quot;chloride-free&quot; to EN 934-2</td>
</tr>
</tbody>
</table>

**STANDARDS**

ASTM C-494 Type F&G
BS EN 934-2

**DOSEAGE**

The normally recommended dosage rate of MasterGlenium 3889 is 0.60 to 2.00 litre per 100kg of total cementitious material.

Other dosages may be recommended in special cases according to the specific site conditions. In this case please consult our Technical Services Department for advice.

**MIXING**

MasterGlenium 3889 is a ready-to-use admixture to be added to the concrete as a separate component. Optimal result is obtained if MasterGlenium 3889 is poured into the concrete mix right after the addition of the first 80% of the mixing water, i.e. when all solids are wetted. Avoid adding the admixture to the dry aggregates.
COMPATIBILITY
MasterGlenium 3889 is not compatible with MasterRheobuild superplasticizers.

MasterGlenium 3889 is suitable for mixes containing:
- Microsilica (Silica Fume)
- Fly Ash (PFA)
- GGBS (ground granulated blast furnace slag)

MasterGlenium 3889 can be used in combination with air entraining admixtures such as MasterAir 100.

STORAGE
MasterGlenium 3889 should be stored in unopened containers or bulk tanks so as to protect from extremes of temperature.

The shelf life is 1 year when stored as above.

The occurrence of a surface layer with MasterGlenium3889 is normal and will have no effect on the performance of the product.

HANDLING AND TRANSPORTATION
No special requirements must be observed during use. Protection gloves and glasses are however recommended. MasterGlenium 3889 is non-flammable, non-toxic or irritant and is not subject to special transport requirements.

SAFETY PRECAUTIONS
MasterGlenium 3889 contains no hazardous substances requiring labelling. For further information refer to the Material Safety Data Sheet.

NOTE
Field service, where provided, does not constitute supervisory responsibility. For additional information contact your local BASF representative.

BASF reserves the right to have the true cause of any difficulty determined by accepted test methods.

QUALITY AND CARE
All products originating from BASF’s Dubai, UAE facility are manufactured under a management system independently certified to conform to the requirements of the quality, environmental and occupational health & safety standards ISO 9001, ISO 14001 and OHSAS 18001.
