AnticoGlaze™

DESCRIPTION
A convenient stain or glaze product consisting of a 100% acrylic polymer clear base that is distributor tinted. ANTICOGLAZE produces beautiful aesthetics with varied degrees of mottling, coloration and glaze.

USES
ANTICOGLAZE is an antiquing stain product used to impart an ‘old world’ mottled look to stucco and EIFS exterior wall systems that are surfaced with an acrylic or elastomeric textured finish. ANTICOGLAZE can be used in conjunction with any BASF Wall Systems branded exterior wall system and will be covered by all warranties in place for those systems.

FEATURES
• Array of colors available
• Residential size container available for smaller jobs resulting in less waste
• Excellent weather resistance
• Silicone enhanced
• A perfect balance of base to pigment, allowing for color highlighting, but not hiding of the substrate
• Fast drying

MIXING
A. Mix the contents of the ANTICOGLAZE pail with a low speed drill and paddle mixer until thoroughly blended. Ensure all the pigment is well dispersed within the liquid. Excess mixing is not needed and will whip air into the clear base.
B. Additives are not permitted.
C. Close container when not in use.
D. Periodic mixing with a gentle stirring action is recommended while using the product.
E. If the product sits overnight, remix for one minute with the drill mixer before using.
F. Clean tools with soap and water immediately after use.

APPLICATION
A. Random Sponge Technique
1. Dip a clean damp sponge into the ANTICOGLAZE product and apply the product to the wall in a random fashion, achieving the swirled or sponged-on look the owner desires. Color, depth and contrast are achieved by distributing the product randomly with the final appearance in mind.
2. Allow to dry for 24 hours, protecting the surface from rain, roof run-off and condensation.
B. Spray Technique
1. Lightly and randomly spray the product on the wall with a low pressure sprayer.
2. Back float the product using a sponge float as needed to remove or soften the look of the color application.
3. Frequently squeeze or rinse with water any excess ANTICOGLAZE from the sponge float.
4. Allow to dry overnight, protecting the surface from rain, roof run-off and condensation.

*ANTICOGLAZE is a freestyle product that produces a look that is greatly influenced by the application technique. It is best to apply the material thinly and repeat the application if necessary to create depth rather than removing excess product. Preparation of mock ups are highly recommended prior to the job start to ensure the proper look is obtained.

LIMITATIONS
A. Protect BASF Wall Systems’ materials during transportation and installation to avoid physical damage.
B. Store BASF Wall Systems’ materials in a cool, dry place protected from freezing. Store at no less than 4˚C (40˚F). Protect from extreme heat and direct sunlight. Shelf life is one year when unopened and stored as directed.
C. Do not apply BASF Wall Systems’ materials in ambient temperatures below 4˚C (40˚F). Provide supplementary heat during installation and drying period (at least 24 hours after installation and until dry) when temperatures less than 4˚C (40˚F) prevail.
D. Protect work from precipitation until dry.
E. Do not apply BASF Wall Systems’ materials to frozen surfaces.
F. Do not exceed 10 oz of water per 5 gallon pail.

TECHNICAL SUPPORT
Consult the BASF Wall Systems Technical Services Department at 800-589-1336 for specific recommendations concerning all other applications.

HEALTH & SAFETY
Follow good safety and industrial hygiene practices during handling and installing products and systems. Take necessary precautions and wear the appropriate personal protective equipment as needed. Read Safety Data Sheet and related literature on products before specification and/or installation.

For medical emergencies only call chemtrec at (800) 424-9300.

WARRANTY
BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF MAKES NO OTHER WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO ITS PRODUCTS. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser. BASF WILL NOT BE RESPONSIBLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFITS) OR PUNITIVE DAMAGES OF ANY KIND.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
