Senerlastic Plus Finish
100% acrylic-based, textured elastomeric finish

Product Bulletin

USES
SENERLASTIC PLUS Finish is primarily intended for use as a finish over non-textured exterior wall surfaces such as cured stucco, concrete and unit masonry. SENERLASTIC PLUS Finish can also be used to provide an aesthetically pleasing surface color and texture for poured concrete, Senergy Cement-Board Stucco and all Senergy Surfacing Systems, conventional stucco, Senergy Stucco Wall System. Elastomeric finishes should not be applied indoors. UV-light is required for curing.

MIXING
1. Thoroughly mix SENERLASTIC PLUS Finish to a uniform workable consistency.
2. A small amount of clean, potable water may be added to adjust workability. (Do not exceed 10 oz of water per 5-gallon pail.)
3. Additives are not permitted.
4. Close container when not in use.
5. Clean tools with soap and water immediately after use.

DESCRIPTION
Siliconized, factory-mixed, 100% acrylic-based, textured elastomeric finish that provides excellent flexibility, weatherability, and increased resistance to mildew growth.

PACKAGING
31.7 kg per 19-liter pail (70 lbs per 5-gallon pail)

COLORS & TEXTURES
Available in Senergy's 128 standard colors and custom colors, in Senergy's CLASSIC, FINE, SAHARA and TEXTURE Finishes.

COVERAGE
Coverage rates may vary depending on the porosity of substrate and application techniques.
Approximate coverages:
CLASSIC Finish: 13.0 m² (140 ft²) per pail
FINE Finish: 13.0 m² (140 ft²) per pail
SAHARA Finish: 11.1 m² (120 ft²) per pail
TEXTURE Finish:
Smooth finish application:
Approximately 400 ft² per coat, per pail (minimum 2 coats)
Skip trowel application:
Approximately 170 ft² per pail

TECHNICAL INFORMATION
Consult our Technical Services Department for specific recommendations concerning all other applications. Consult the Senergy website, www.senergy.basf.com, for additional information about products and systems and for updated literature.

www.senergy.basf.com

Features | Benefits
--- | ---
Silicone enhancement | Increases both water repellency and resistance to mold and mildew
Resists airborne pollutants | Cleans easier, reduces maintenance
Bridges hairline cracks smaller than 1/32" | Protects
100% acrylic polymer-based chemistry | Provides long-term durability and weather resistance
Intergral color | Reduces maintenance and recoating
Weather resistant | Repels water and resists wind-driven rain
Seals existing, non-moving hairline cracks | Protects
Breathable | Does not blister, peel or flake
Abrasion resistant | Durable
Factory mixed | Ready to use, no additives
Water based | Safe, non-toxic, clean up easily with soap and water
High UV resistance | Resist fading
Senerlastic™ Plus Finish

SURFACE PREPARATION
Substrates must be clean, dry, sound and free of loose material, releasing agents, paint, efflorescence, contaminants and other coatings. Fill cracks or voids with an appropriate, compatible material to provide a solid substrate prior to application of SENERLASTIC PLUS Finish. Ensure patching material is dry prior to application of SENERLASTIC PLUS Finish.

Note: The primers are designed to improve color uniformity and have a negligible effect on adhesion.

Concrete:
1. Allow concrete to cure prior to application of SENERLASTIC PLUS Finish.
2. Remove all projections, form lines and release agents.
3. When needed, apply STUCCO PRIME to cured concrete with a sprayer, 10 mm (3/8") nap roller or good-quality latex paint brush at a rate of approximately 3.6–6.1 m² per liter (150–250 ft² per gallon). STUCCO PRIME shall be dry to the touch before proceeding to the SENERLASTIC PLUS Finish application.

Stucco:
1. Allow stucco to cure before applying SENERLASTIC PLUS Finish.
2. When needed, apply STUCCO PRIME to cured stucco with a sprayer, 10 mm (3/8") nap roller or good-quality latex paint brush at a rate of approximately 3.6–6.1 m² per liter (150–250 ft² per gallon). STUCCO PRIME shall be dry to the touch before proceeding to the SENERLASTIC PLUS Finish application.

APPLICATION
1. Apply SENERLASTIC PLUS Finish directly to the acceptable substrate with clean stainless steel trowel.
   Note: In order to minimize the possibility of Base Coat or BASF STUCCOBASE read-through with color #330 Maxi-White in CLASSIC, we recommend the use of BASF TINTED PRIMER or STUCCO PRIME. Base Coat read-through with CLASSIC in Maxi-White is very applicator sensitive.
2. Apply and level SENERLASTIC PLUS Finish during the same operation to minimum obtainable thickness consistent with uniform coverage.
3. Maintain a wet edge on SENERLASTIC PLUS Finish by applying and texturing continually over the wall surface.
4. Work SENERLASTIC PLUS Finish to corners, joints or other natural breaks and do not allow material to set up within an uninterrupted wall area.
5. Float SENERLASTIC PLUS Finish to achieve final texture.

LIMITATIONS
1. Cracks greater than 0.8 mm (1/32") must be pre-sealed.
2. Must be stored, applied and protected until dry at 4°C (40°F) or more.
3. Appearance of CLASSIC and COARSE might vary if floated by different mechanics.
4. Protect Senergy materials during transportation and installation to avoid physical damage.
5. Store Senergy materials in a cool, dry place protected from freezing. Store at no less than 4°C (40°F). Protect from extreme heat and direct sunlight. Shelf life is two years when unopened and stored as directed.
6. Do not apply Senergy materials in ambient temperatures below 4°C (40°F). Provide supplementary heat during installation and drying period (at least 24 hours after installation and until dry) when temperatures less than 4°C (40°F) prevail.
7. Do not apply Senergy materials to frozen surfaces.
8. Choose a Finish Coat color with a light reflective value (LRV) of 20% or higher if used with EIFS that incorporate expanded polystyrene (EPS). EPS has a sustained service temperature limitation of approximately 160°F (71°C).
9. Do not exceed 10 oz of water per 5 gallon pail.

HEALTH, SAFETY AND ENVIRONMENTAL
Read, understand and follow all Safety Data Sheets and product label information for this product prior to use. The SDS can be obtained by visiting www.senergy.basf.com. Use only as directed.

WARRANTY
BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF MAKES NO OTHER WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO ITS PRODUCTS. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
