StuccoBase™ Premix

DESCRIPTION
Factory-blended mixture of Portland cement, reinforcing fibers, sand, and other proprietary ingredients. STUCCOBASE PREMIX conforms to ASTM C926, the standard specification for application of Portland cement-based stucco and ICC-ES acceptance criteria AC-11 for cementitious exterior wall coatings.

USES
For use with the BASF Stucco Wall Systems. Acceptable substrates include: PermaBase® Cement Board and other cement-boards conforming with ASTM C1325 (Type A-exterior); poured concrete/unit masonry; ASTM C1177 type sheathings including eXP™ sheathing; GlasRoc® sheathing; Securock® glass-mat sheathing; DensGlass™ exterior sheathing; GreenGlass sheathing and Weather Defense Platinum sheathing; gypsum sheathing (ASTM C79/ C1396), expanded polystyrene insulation board complying with ASTM C578 Type II with nominal 1.35 lbs/ft³ density, Exposure I or exterior plywood (Grade C/D or better), or Exposure I OSB, to which an air/water-resistive membrane and lath are attached.

MIXING
1. Use mixer which is clean and free of foreign substances.
2. Add 7.6-9.5 liters (2–2.5 gallons) of clean potable water to mixer.
3. Slowly add one bag of STUCCOBASE PREMIX.
4. Mix for one minute at normal mixing speed. Allow material to set for 2–4 minutes with mixing blades at rest. Then re-mix, adding water to achieve desired consistency. Desired consistency varies with type of application (trowel or gun), substrate (paper-backed lath or block) and whether the stucco is applied to a wall or a ceiling.

Note: Over-mixing may cause excessive air entrainment. (Due to the potential of uncontrolled air-entrainment, the use of latex polymers with StuccoBase Premix is not recommended. Before making any on-site additions other than water to StuccoBase Premix, consult specific additive manufacturer for recommendations.)

APPLICATION
1. Apply BASF Stucco Wall System materials in accordance with current specifications and details.
2. Over wood or metal framing with sheathing, a water-resistive barrier and PermaLath, PermaLath 1000, wire fabric or self furring, expanded metal lath must be installed in accordance with ASTM C1063. When installed over wood based sheathing, two layers of grade D building

Advantages
- Superior weathering properties; long-term durability
- Proprietary formulation; improved moisture resistance and low water absorption
- Fiber reinforced; resists shrinkage cracking when properly cured
- Needs only addition of water; easy to mix and use with consistent results
- Sand is factory added, consistency in sand; quality assurance

STUCCOBASE PREMIX

1. Apply the first "scratch" coat by hand troweling or machine spraying to provide the required total thickness as soon as the first coat is rigid enough to accept it without damage to the first coat. Level surface using rod or darby. Brown coat must be uniform in thickness. Ensure that the second coat is applied over a damp first coat. The first coat and second coat combined thickness will be from 19 mm (3/4") to 22 mm (7/8"). This double back method of application is done where by the first and second coats are applied over a sufficiently damp first coat. The first coat and second coat combined thickness will be from 19 mm (3/4") to 22 mm (7/8"). This double back method of application is done.

2. Apply the second "brown" coat by hand troweling or machine spraying to provide the required total thickness as soon as the first coat becomes firm, score the entire surface in one direction only. Score vertical surfaces horizontally to provide key for second coat.

3. After surface has sufficiently hardened, use sponge or hard rubber hose bibs.

4. Damp cure for at least 48 hours by lightly and evenly fogging the surface with water at least twice a day. Direct sunlight, hot temperatures, low humidity and wind may make additional fogging necessary.

5. Allow STUCCOBASE PREMIX to cure a minimum of 6 days prior to application of EPS insulation board shapes, BASF Base Coats or Primer and Finish Coat application.

LIMITATIONS

1. Surface and ambient temperatures must be between 4°C and 36°C (40°F-100°F) during the application and curing.

2. Do not install stucco under hot, dry, or windy conditions.

3. Avoid applying in direct sunlight.

4. Protect walls from rain, snow, and frost for a period of 48-72 hours; otherwise, low strength, streaking, or efflorescence may occur.

5. Do not install stucco over accessories, such as lights, bullet boxes, hose bibs.

6. Texture will vary depending upon application technique and sand type; test installations are recommended.

7. Apply STUCCOBASE PREMIX in a continuous application within the area defined by expansion joints; always work to a wet edge to eliminate cold joints.

8. Proper application is the responsibility of the user.

9. Protect materials from moisture during shipment and storage.

10. Shelf life of STUCCOBASE PREMIX is 8 months if stored as directed.

Proposition 65

This product contains materials listed by the state of California as known to cause cancer, birth defects or other reproductive harm.

VOC Content

0 g/l or 0 lbs/gal less water and exempt solvents.

WARRANTY

BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF MAKES NO OTHER WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO ITS PRODUCTS. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser. BASF WILL NOT BE RESPONSIBLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFITS) OR PUNITIVE DAMAGES OF ANY KIND.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF's present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
