27. Typical Termination at Metal Coping / Roof Edge Flashing - Option 01  
28. Typical Termination at Metal Coping / Roof Edge Flashing - Option 02  
29. Typical Flashing / Termination at Roof  
30. Typical Kick-Out Flashing

### Notes:

- **Install BASF materials in accordance with current installation instructions.**
- **Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.**
- **The details within represent BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. They are presented in good faith by BASF Wall Systems. The details are subject to change without notice. BASF Wall Systems accepts no liability for the end use of the details. For conditions not shown, consult BASF Wall Systems for review of specific detail.**
Senergy Platinum CI Stucco Plus

TYPICAL FASTENING PATTERN

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Sheathing:
  Fasten per sheathing manufacturer's recommendations or project design requirements.
- Neopor GPS Plus Rigid Insulation Board:
  Secure with 2 to 3 fasteners per board to hold in place until lath is installed.
- Lath – PERMALATH 1000:
  Use appropriate fasteners spaced not more than 152 mm (6") o.c. vertically, 406 mm (16") o.c. horizontally; metal or wire lath: use appropriate fasteners spaced not more than 178 mm (7") o.c. vertically, 406 mm (16") or 610 mm (24") o.c. horizontally, per requirements of ASTM C1063. Refer to SENERGY PLATINUM CI STUCCO PLUS specifications.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
Senergy Platinum CI Stucco Plus

TYPICAL MASONRY/CONCRETE CONSTRUCTION

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Multiple coats of SENERSHIELD-R/-RS/-VB may be required to achieve a pin-hole free application.
- Ensure SENERSHIELD-R/-RS/-VB is dry prior to Neopor GPS Plus Rigid Insulation Board installation.
- Basic requirements for Plaster Base:
  - BASF STUCCOBASE 3/8” to 1/2” thickness: Min. 1” 20 ga. wire, min. 2.5 lb/sq.yd. metal lath or acceptable alternative.
  - BASF STUCCOBASE equal to or greater than 1/2” thickness: PERMALATH 1000 or min. 1½” 17 ga. wire, min. 2.5 lb/sq.yd. metal lath or acceptable alternative.

- Basic requirements for Plaster Base:
  - BASF STUCCOBASE equal to or greater than 1/2” thickness: PERMALATH 1000 or min. 1½” 17 ga. wire, min. 2.5 lb/sq.yd. metal lath or acceptable alternative.
Senergy Platinum CI Stucco Plus

TYPICAL TERMINATION AT FOUNDATION - FLUSH WITH CASING / STOP BEAD

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Terminate the PLATINUM CI STUCCO PLUS system a minimum of 152 mm (6") above raw earth and 50 mm (2") above paved surface.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the casing/stop bead flange.
- Ensure casing/stop bead includes weep holes to facilitate drainage.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
Senergy Platinum CI Stucco Plus

TYPICAL TERMINATION AT FOUNDATION WITH CASING / STOP BEAD

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Terminate the PLATINUM CI STUCCO PLUS system a minimum of 152 mm (6") above raw earth and 50 mm (2") above paved surface.
- Provide minimum 25 mm (1") overlap at framing/foundation transition.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the casing/stop bead flange.
- Ensure casing/stop bead includes weep holes to facilitate drainage.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
Senergy Platinum CI Stucco Plus

TYPICAL TERMINATION AT FOUNDATION WITH AMICO C-I WEEP TRAC™

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Terminate the PLATINUM CI STUCCO PLUS system a minimum of 152 mm (6") above raw earth and 50 mm (2") above paved surface.
- Provide minimum 25 mm (1") overlap at framing/foundation transition.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure SENERSHIELD-R/-RS/-VB application is continuous behind the PLATINUM CI STUCCO PLUS system at change in substrate – apply BASF WS FLASH with FLASHING PRIMER at change in substrate followed by fully coating WS FLASH with SENERSHIELD-R/-RS/-VB.
- Do not apply finish into joint to receive sealant.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

• Install BASF materials in accordance with current installation instructions.
• Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
• At trim intersection it is recommended that the vertical trim be continuous.
Senergy Platinum CI Stucco Plus

TYPICAL SURFACE CONTROL JOINT

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Provide control joints every $13m^2$ (144 ft$^2$) and placement as determined by the Design Professional. Maximum recommended uncontrolled length or width is 5.5 m (18 ft) and a maximum uncontrolled length to width ratio of 2-1/2 to 1.
- Lath must be broken at the control joint accessory.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure SENERSHIELD-R/-RS/-VB application is continuous behind the PLATINUM CI STUCCO PLUS system – embed BASF MAXFLASH Liquid Flashing Membrane or BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB at inside corner.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Extend BASF DIAMONDSHIELD or Senergy Reinforcing Mesh and Base Coat from band or shape onto BASF STUCCOBASE a minimum of 76 mm (3").
- Provide a 6:12 slope on horizontal applications greater than 1”.
- Adhere EPS or NEOPOR GPS PLUS Rigid Insulation band/shape with Senergy Base Coat to BASF STUCCOBASE surface.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Attach corner bead with wire ties, anchors or fasteners to resist movement during application of BASF STUCCOBASE.
- Fill corner bead solid with BASF STUCCOBASE.
Senergy Platinum CI Stucco Plus

TYPICAL DECORATIVE SHAPE

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Extend BASF DIAMONDSHIELD or Senergy Reinforcing Mesh and Base Coat from band or shape onto BASF STUCCOBASE a minimum of 76 mm (3").
- Adhere EPS or NEOPOR GPS PLUS Rigid Insulation band/shape with Senergy Base Coat to BASF STUCCOBASE surface.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
Senergy Platinum CI Stucco Plus

TYPICAL WINDOW HEAD (FLUSH)

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.
- Provide end-dams at flashing terminations.
- Seal flashing drip edge to window frame.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.
• Install BASF materials in accordance with current installation instructions.
• Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
• As recommended by window manufacturer, apply sealant to back of window flange at head prior to installation of window.
• Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.
• Provide end-dams at flashing terminations.
• Seal flashing drip edge to window frame.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure SENERSHIELD-R/-RS/-VB and BASF MAXFLASH Liquid Flashing Membrane and BASF SHEATHING FABRIC are properly applied into rough opening in accordance with application guidelines. Reference Air/Water-Resistive/Vapor Barrier Application Guidelines technical bulletin.
- Do not apply finish into joint to receive sealant.
- Use non-hole punched version of Amico C-I Weep Trac on jambs.
Install BASF materials in accordance with current installation instructions.

Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.

Ensure SENERSHIELD-R/-RS/-VB and BASF MAXFLASH Liquid Flashing Membrane and BASF SHEATHING FABRIC are properly applied into rough opening in accordance with application guidelines. Reference Air/Water-Resistive/Vapor Barrier Application Guidelines technical bulletin.

Use non-hole punched version of Amico C-I Weep Trac on jambs.
**TYPICAL FLANGED WINDOW JAMB**

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure SENERSHIELD-R/-RS/-VB and BASF MAXFLASH Liquid Flashing Membrane and BASF SHEATHING FABRIC are properly applied into rough opening in accordance with application guidelines. Reference Air/Water-Resistive/Vapor Barrier Application Guidelines technical bulletin.
- As recommended by window manufacturer, apply sealant to back of window flange at jamb prior to installation of window.
- Use non-hole punched version of Amico C-I Weep Trac on jambs.
- Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over Amico C-I Weep Trac.

Senergy Platinum CI Stucco Plus

TYPICAL PIPE PENETRATION

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- SENERSHIELD-R/-RS/-VB with BASF MAXFLASH Liquid Flashing Membrane or SHEATHING FABRIC or WS FLASH with FLASHING PRIMER can be applied from sheathing onto pipe in lieu of the secondary seal.
- Ensure all penetrations through the PLATINUM CI STUCCO PLUS system are properly sealed.

This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.
Senergy Platinum CI Stucco Plus

TYPICAL DRYER VENT

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- SENERSHIELD-R/-RS/-VB with BASF MAXFLASH Liquid Flashing Membrane or SHEATHING FABRIC or WS FLASH with FLASHING PRIMER can be applied from sheathing onto pipe in lieu of the secondary seal.
- Ensure all fastener penetrations through the PLATINUM CI STUCCO PLUS system are properly sealed.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure all fastener penetrations through the PLATINUM CI STUCCO PLUS system are properly sealed.

TYPICAL DOWNSPOUT

- DOWNSPOUT*
- BASF DIAMONDSHIELD OR SENERGY REINFORCING MESH (OPTIONAL)
- SENERGY BASE COAT
- SENERGY FINISH
- BASF STUCCOBASE
- PERMALATH 1000 OR METAL PLASTER BASE
- NEOPOR GPS PLUS RIGID INSULATION BOARD
- FASTENER W/ SLEEVE SET IN SEALANT*
- DOWNSPOUT STRAP SET IN SEALANT*
- ACCEPTABLE SHEATHING*

For the most current version of this literature, please visit our website at www.senergy.basf.com.

Senergy Platinum CI Stucco Plus

TYPICAL LIGHT FIXTURE

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- Ensure all penetrations through the PLATINUM CI STUCCO PLUS system are properly sealed.

- SENERSHIELD-R/-RS/-VB
- BASF DIAMONDSHIELD OR SENERGY REINFORCING MESH (OPTIONAL)
- SENERGY BASE COAT
- PERMALATH 1000 OR METAL PLASTER BASE
- BASF STUCCOBASE
- LIGHT FIXTURE FLANGE SET IN SEALANT*
- SENERGY FINISH
- MOUNTING BOX WITH BLOCKING, AS NEEDED*
- LIGHT FIXTURE*
- NEOPOR GPS PLUS RIGID INSULATION BOARD
- ACCEPTABLE SHEATHING*

*NOTE: BY OTHERS
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- It is recommended to lap coping or roof edge flashing over the PLATINUM CI STUCCO PLUS system a minimum of 50 mm (2”) with drip edge sealed.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

TYPICAL TERMINATION AT METAL COPING / ROOF EDGE FLASHING - OPTION 02

- Install BASF materials in accordance with current installation instructions.
- Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.
- It is recommended to lap coping or roof edge flashing over the PLATINUM CI STUCCO PLUS system a minimum of 50 mm (2") with drip edge sealed.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

• Install BASF materials in accordance with current installation instructions.

• Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.

• Use BASF MAXFLASH Liquid Flashing Membrane or embed BASF SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.

• Terminate PLATINUM CI STUCCO PLUS system a minimum of 50 mm (2") above sloped roof.
This detail represents BASF Corporation - Wall Systems (hereinafter BASF Wall Systems) latest recommendations. It is presented in good faith by BASF Wall Systems. The detail is subject to change without notice. BASF Wall Systems accepts no liability for the end use of the detail. For conditions not shown, consult BASF Wall Systems for review of specific detail. For the most current version of this literature, please visit our website at www.senergy.basf.com.

• Install BASF materials in accordance with current installation instructions.

• Unsatisfactory conditions shall be reported to the General Contractor and corrected before the application of BASF products.

• Use BASF MAXFLASH Liquid Flashing Membrane or embed SHEATHING FABRIC in SENERSHIELD-R/-RS/-VB where it laps over the Amico C-I Weep Trac flange.

• Terminate PLATINUM CI STUCCO PLUS system a minimum of 50 mm (2") above sloped roof.

• Extend step flashing 50 mm (2") behind PLATINUM CI STUCCO PLUS system.

• Kickout flashing: sealed or soldered seams, recommended minimum 100 mm (4") in height, extend 50 mm (2") from wall and angled to direct water into gutter/away from wall surface.
Warranty

BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF MAKES NO OTHER WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO ITS PRODUCTS. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser. BASF WILL NOT BE RESPONSIBLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFITS) OR PUNITIVE DAMAGES OF ANY KIND.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
