Water-Resistive Barrier Requirements for Cement Plaster Stucco on Framed Construction in the 2006, 2009 & 2012 IBC and IRC

Technical Bulletin

The basic water-resistive barrier requirements prescribed in the International Building Code and the International Residential Code are described below. Local building code requirements may differ due to local amendments to these codes or other code versions in use.

Water-Resistive Barrier Requirements for StuccoBase or ASTM C926 stucco (field mix) are:

- **Non-wood based sheathing** - a minimum of 1 layer of No.15 asphalt felt, complying with ASTM D226 for Type 1 felt or other approved material.

- **Wood based sheathing** - a water-resistive vapor permeable barrier with a performance at least equivalent to 2 layers of Grade D paper.

The code includes an exception for water-resistive barriers over wood based sheathing. It states: “Exception: where the water-resistive barrier that is applied over wood based sheathing has a water resistance equal to or greater than that of 60 minute Grade D paper and is separated from the stucco by an intervening, substantially non-water absorbing layer or drainage space.”

Alternative water-resistive barriers that may be used include polymeric water-resistive barriers such as Tyvek® StuccoWrap and acceptable equals that comply with and are recognized by local building codes as meeting the requirements listed above. Please refer to specific manufacturers for verification of their products’ compliance with applicable codes.

Senershield-R fluid-applied water-resistive barrier may be used, provided a slip sheet (building paper or other separation layer) or paper-backed lath is applied over the Senershield-R.

**Note:** Senershield-R is tested per ASTM E2178 Air Permeance of Building Materials and may be used as part of an air barrier system.
Warranty

BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF makes no other warranty or guarantee, express or implied, including warranties of merchantability or fitness for a particular purpose with respect to its products. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser. BASF will not be responsible for any special, incidental, consequential (including lost profits) or punitive damages of any kind.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
