Finishes Selection Guide

Senergy® Finishes
Color, Texture & Protection

Rich textures. Inspired colors. A myriad of choices to create inviting surfaces and lasting impressions. Beyond looks, Senergy advanced decorative and protective finishes offer the performance that traditional cement-based finishes and paints never could. Performance that protects your home or building through rain and sleet, baking hot sun or the dampness of high humidity. And keeps it looking great for years to come.

Choose Your Finish | Senergy has the finish options to meet your needs.

**Senerflex® Finish**
A 100% acrylic polymer-based finish with high solids formulation, Senerflex offers long-term durability and weather resistance. Used over cement-based surfaces, Senerflex is flexible enough to seal existing, non-moving hairline cracks, thereby providing protection against degradation caused by moisture and pollution intrusion. With a harder surface than elastomeric finishes, Senerflex offers excellent abrasion and dirt pick-up resistance.

**Fine**
Factory-mixed, 100% acrylic polymer finish coat. Available in Senergy’s standard colors and custom colors. FINE Finish utilizes uniformly-sized aggregates for a uniform, fine texture.

**Sahara**
Factory-mixed, 100% acrylic polymer finish coat. Available in Senergy’s standard colors and custom colors. SAHARA Finish provides a uniform, “pebble” appearance.

**Texture**
Factory-mixed, 100% acrylic polymer finish coat. Available in Senergy’s standard colors and custom colors. TEXTURE Finish can achieve a wide variety of free-formed, textured appearances, including stipple and skip-trowel. Note: If a “smooth” application is required, multiple coats and skillful application techniques will be required.

**Classic**
Factory-mixed, 100% acrylic polymer finish coat. Available in Senergy’s standard colors and custom colors. CLASSIC Finish has a medium “worm-holed” appearance which is achieved by the random aggregate sizes in the Finish. The “worm-holed” look can be circular, random, vertical or horizontal.

**Coarse**
Factory-mixed, 100% acrylic polymer finish coat. Available in Senergy’s standard colors and custom colors. COARSE Finish has a heavy “worm-holed” appearance which is achieved by the random aggregate sizes in the Finish. The “worm-holed” look can be circular, random, vertical or horizontal.

---

Color & Texture The very first impression of a building is almost always made by its color. That’s why our color palette presents so many choices for distinctive style and design, limited only by the imagination. All Senerflex decorative and protective finishes are available in 128 standard colors as well as unlimited custom tinting.

Create a Lasting Impression

**Senerlastic™ Finish**
An acrylic-based elastomeric finish.
Elastomeric finishes go beyond the limits of traditional cement-based and acrylic finishes. Senerlastic is specifically designed to protect cement-based substrates with hairline cracks (smaller than 1/32") that may expand and contract due to extreme temperature changes. Flexible and weatherproof, Senerlastic literally bridges the crack as it widens, and returns to its original shape as the crack contracts.

**Chroma™ Finish**
High performance colorants integrated into 100% acrylic polymer finishes formulated with advanced technology for superior fade resistance, improved long-term performance and dirt pick-up resistance.

**Senerflex Tersus™ Finish**
TERSUS finishes are a line of modified acrylic textured finishes designed to provide excellent water repellency and enhanced resistance to environmental soiling. The water repellent properties of the finishes make the surface hydrophobic as well as more resistant to mold and mildew. When rain water contacts the surface, it beads and carries away dirt, soil and debris in its pathway. The built in anti-soiling properties of the finishes resist dirt and staining reducing maintenance costs and extending a building’s aesthetic appeal.

**Specialty Finishes**
100% acrylic polymer finishes with advanced technology to improve long-term performance and dirt pick-up resistance on exterior and interior walls. Use to create unique stone-like, metallic or mottled stucco appearance to complement a building’s design.

**Encausto Verona**
Factory-mixed, 100% acrylic polymer finish coat. Available in standard and custom colors. ENCAUSTO VERONA Finish utilizes uniformly-sized aggregate to achieve a free-formed, flat texture. A mottled look (as shown) can be achieved by combining multiple colors.

**Aurora TC-100**
Factory-mixed stone finish consisting of colored aggregates in a 100% acrylic transparent binder. Available in many standard colors and a variety of custom colors. AURORA TC-100 provides a stone-like appearance, either rough or smooth depending upon application.

**Aurora Stone**
Factory-mixed, variegated finish consisting of colored aggregates in a transparent 100% acrylic binder, applied over TINTED PRIMER. Available in twelve standard colors. AURORA STONE Finish provides a rough, stone-like appearance.

**Metallic**
Factory-mixed, 100% acrylic polymer finish coat. METALLIC Finish has a pearlescent appearance. It utilizes uniformly-sized aggregates for a uniform fine texture. Available in a variety of colors.

**Alumina**
Factory-mixed, reflective stone finish consisting of colored aggregate and large black mica flakes in a 100% acrylic transparent binder. Available in 10 standard colors. ALUMINA Finish provides a classic granite or marble-like textured finished appearance.

The Beauty of Texture

Packaging

Senerflex, Specialty and Chroma Finishes
31.7 kg per 19-liter pail
(70 lbs per 5-gallon pail)

Senerflex Tersus Finish
29.484 kg per 19-liter pail
(65 lbs per 5-gallon pail)

Coverages

Coverage rates may vary depending on the coating texture, porosity of substrate and application techniques.

Senerflex Finishes
Classic Finish: 13 m² (140 ft²) per pail
Coarse Finish: 8.3 m² (90 ft²) per pail
Fine Finish: 13 m² (140 ft²) per pail
Sahara Finish: 11.1 m² (120 ft²) per pail
Texture Finish: Coverage varies depending upon application.

Senerlastic Finishes
Classic Finish: 13 m² (140 ft²) per pail
Fine Finish: 13 m² (140 ft²) per pail
Sahara Finish: 11.1 m² (120 ft²) per pail
Texture Finish: Coverage varies depending upon application.

Chroma Finishes
All Chroma Finishes must be factory tinted.
F1.0 Finish: 13 m² (140 ft²) per pail.
M1.5 Finish: 11.1 m² (120 ft²) per pail.
R1.5 Finish: 13 m² (140 ft²) per pail.

Senerflex Tersus Finishes
F1.0 Finish: 15.8 m² (170 ft²) per pail.
M1.5 Finish: 12.1 m² (130 ft²) per pail.

Specialty Finishes

Encausto Verona Finish: 23.2 m² (250 ft²) per pail applied in two coats. Coverage varies depending upon application techniques, substrate type and condition.

Aurora TC-100 Finish: 6.5–9.2 m² (70–100 ft²) per pail depending upon method of application.

Aurora Stone Finish: 6.5 m² (70 ft²) per pail at 3.2 mm (1/8”) thickness.

Metallic Finish: Coverage varies depending upon type of Finish Coat textures and substrates utilized.

Alumina Finish: 8.4–9.2 m² (90–100 ft²) per pail.

Uses

1. Provides a protective, weather-resistant and aesthetically pleasing surface color and texture for BASF Wall Systems.
2. Can also be utilized as a textured finish for poured concrete or unit masonry, conventional stucco, BASF Stucco Wall Systems, BASF Cement-Board Stucco™ Systems, all BASF Surfacing Systems, and interior veneer plaster or gypsum wallboard.
3. Do not apply materials to frozen surfaces.
4. Shelf life is two years when unopened and stored as directed.
5. Select Finish Coat color with a light reflective value (LRV) of 20% or higher when applied over EIFS with EPS insulation. The use of dark colors (LRV less than 20%) is not recommended with EIFS that incorporate expanded polystyrene (EPS). EPS has a sustained service temperature limitation of approximately 160°F (71°C).

Additional limitations for Senerflex Finishes
6. Does not bridge moving cracks.
7. If using a thicker application of TEXTURE Finish, a longer drying period will be required.
8. Appearance of CLASSIC and COARSE may vary if floated by different mechanics.

Additional limitations for Chroma Finishes
9. Appearance of R1.5 may vary if floated by different mechanics.

Technical Information

Consult the BASF Wall Systems website at www.wallsystems.basf.com or the Technical Services department at 800-589-1336 for support with assembly details, specifications, product bulletins, or warranties.
