MasterSeal® adhesives and sealants use thermoplastic, polyurethane and advanced hybrid technologies to provide the best combination of performance, value and ease of use in roofing applications, even in the harshest environments.

Whether you need to reduce chatter on tile roofs, install a weathertight skylight, or seal flashings and valleys, put the MasterSeal family of roofing adhesives and sealants to work for you.
MasterSeal® Sealants for Roofing

A well built roof protects an owner’s investment. It shields the structure from exposure to harsh outdoor elements, preserves the integrity of the structure, and helps maintain its aesthetic appeal. With a history of high performance and properties designed for a variety of demanding roofing applications, MasterSeal adhesives and sealants help you deliver the long lasting value homeowners expect and deserve.

MasterSeal NP 125 Sealant and Adhesive

Features
- Wide application range
- Clear formula blends in with substrates
- Easy to gun and tool
- Available in a brush grade consistency

Benefits
- Suitable for use in harsh climates
- Simplifies the number of colors for projects
- Allows for faster application
- Allows for application versatility

MasterSeal TX 1 Textured Sealant
One-component, textured sealant for use on rough or grainy building materials, such as stucco and masonry.

Features
- Textured surface
- Resists Weathering
- Strongly adheres to many substrates

Benefits
- Compliments the texture of masonry, stucco and cement board
- Creates long lasting, durable seals
- Versatility for use in a wide range of applications

MasterSeal® NP 1 Sealant
One-component, smooth sealant for use in assembly and repair of roof materials.

Features
- Highly flexible
- Resists Weathering
- Strongly adheres to many substrates

Benefits
- Keeps moving joints weather-tight
- Creates long lasting, durable seals
- Application versatility & prevention of tile chatter

MasterSeal® NP 100 Sealant
One-component, high movement sealant for use on a wide range of substrates.

Features
- High movement
- Adheres to challenging substrates like PVDF coated metals
- Highly resistant to weathering

Benefits
- Keeps moving joints weather-tight
- Application versatility
- Creates long lasting, durable seals
