## Fast track floor solution for Automotive Industry Nissan Training Centre gets a New Look, Gauteng - South Africa

Our reference in Gauteng (South Africa): Nissan Training Centre

### The background

Nissan automotive groups training center in Rosslyn Gauteng needed a high performance floor that can be functional and aesthetically pleasing due to the nature of the training center there floors were always a sore point in the brands image. When Nissan needed to refurbish its 1,000 m2 floor surface they selected, BASF Construction Chemicals as their supplier of choice.

In addition to improving look of the building through a High Gloss epoxy, the client Specified a seamless floor surface that could Withstand the abuse from its Vehicles, tool trolleys, industry cleaners. Installation Needed to take place without Nissan stopping Training, so a dust-free fast track solution was essential.

### The challenge

The contractor had to work in the production area whilst the operation had no training planned. The brief called for area to repaired and returned to service with minimum down-time, and with stringent measures for maintaining a dust-free environment.
